RE: UIC Class III Permit No.
UTU300001; FY93 Annual
Inspection

Dear Mr. York:

Thank you for the cooperation shown during the August 10, 1993 annual inspection of your injection well facilities. Moab Salt, Inc. is operating within the limits of Permit Number UTU300001. A copy of the inspection report is attached.

Only one issue was found during the inspection which requires consideration. Please directly record daily wellhead gauge pressures or flow rates at wells Nos. 5, 6 and 15 when they are operating, even if the well is injecting under a vacuum. Inasmuch as there are no "slots" on the operator's shift report for these parameters, it may be helpful to modify the form. These values will give us a point of reference when mechanical integrity tests are done.

If you have any questions, please call Jerry Jackson at 538-6146.

Sincerely,

Larry J. Mize, P.E., Manager
Ground Water Protection Section
